

Vanguard™ Lithium-Ion Swappable Battery Pack (Si1.5)

The [Vanguard Lithium-Ion 1.5kWh* Commercial Battery Pack \(Si1.5\)](#) is the latest innovation in lithium-ion battery technology from Briggs & Stratton. Accompanying the current lineup of batteries, the Si1.5 features many of the benefits found in the [3.5kWh*](#), [5kWh*](#) and [7kWh*](#) batteries, while also adding some new highlights.

The Si1.5 is built to bring efficiency, versatility and reliability to users in multiple industries that require battery power. The battery's exchangeable nature allows it to be easily swapped out between applications on the jobsite to help reduce downtime. The Si1.5 also features expandable power, meaning more than one pack can be used together to meet greater energy needs.

The Si1.5 comes with a standard interface that can work across multiple product platforms, adding versatility and reducing unnecessary costs. The battery is set up for optimized network communication with the product and the internet via an IoT device. The connectivity capability also means that users can monitor the battery remotely, control battery-powered products remotely and conduct fleet management. Like all Vanguard products, the Si1.5 is tested to ensure that it is able to withstand tough environments and is durable against abuse, debris and dirt.

**Total energy measured using a 0.2C discharge per IEC 61960-3:2017*
